How did you hear about Project Green Challenge? *

Through Patricia Childs the green team coordinator at

What has inspired you to apply to be a Campus Rep?*

I have been involved with the green team at our school since I started in the 8th Grade.

What clubs/organizations are you connected to on your campus, if any?

Green Team
Swim Team
Drama Club

How would you engage students to participate in PGC 2015? How would you build excitement around the challenge?*

I would promote the program in my school with announcements, contests and community involvement. I was thinking we could have a green thought for the day on the announcements.

What forms of social media are you familiar with? How would you use them to reach out to students on your campus before?*

**Twitter, Instagram , Snap Chat, website
I would post pictures to attract people to come to events and then take a lot of pictures so people who missed it would want to come to the next event.**

What is one green initiative that is happening currently in your school?*

We gave students school water bottles to encourage them to fill them up at the water cooler each day instead of adding bottles to the landfill.

What is a green initiative that you would like to see start at your school?*

Encourage students to recycle more. Raise awareness of sustainable containers for lunch. Making their own lunchables in a reusable container is not only healthier but it is sustainable.
