December 3, 2015

Chesapeake Bay Trust

To whom it may concern;

The Severn River Association acknowledges that the Severn River is a beneficiary of the activities of the Baltimore Lab School and, along with the Ben Oaks Watershed Stewards, wholeheartedly supports the Baltimore Lab School Watershed Steward group and their planned activities. We agree that what they learn through these experiences will strengthen their love for the environment and make them great stewards of clean water throughout the rest of their lives.

As one of the largest organization participating in Marylanders Grow Oysters, the Severn River Association loves the Baltimore Lab School introducing their students to the oyster and its role in the Chesapeake Bay environment for 2016.

Both the Severn River Association and the Ben Oaks Watershed Stewards appreciate that these students are learning that every storm drain is a front door to the bay through one of its many subwatersheds. They also learn the important role of trees for clean water and how to tell if a stream is healthy.

The Severn River Association and the Ben Oaks Watershed Stewards know that these children are the key to changing behavior of others, including adults, to benefit the bay and all of the creatures who depend on clean water.

Sincerely,

Lynne Rockenbauch
President, Severn River Association
Ben Oaks Watershed Stewards
