

Title: Cringiest Rap

By: Matt Milhiser

Yo, let that beat drop

This rap is about Trout Migration

Do you guys need a explanation to understand my flow?

-Beat drop-

If Young Metro Don't trust He Gonna Teach A Lesson about these Trout Migration

So, Yo let's all recognize these facts that we know about Trout Migration

Do, you guys need a calculation of how many Trouts we have?

If you guys do need a calculation go check the foundations people have about Trout Migration

Remember to give a donation to the foundation

My Quilt Square

By: Julian U.

My quilt square is about trout population growth and decline. In the picture, there are many fish, some big but most small. This is showing that the population of trout is going up. However, their population suffered a massive decline in the '80s. There are many efforts trying to conserve trout. In Maryland, the Eastern Brook Trout Joint Venture has been trying to restore the trout population for years, and so far have been succeeding. They are continuing to get support and hopefully we can get the trout population back to the way it was.

Trout Hybrids

Clay L.

The trout is a species of numerous different types. Given the different types they all appeared from reproduction of numerous different genes being mixed together. The trout such as a tiger trout which has a tiger like skin tone on it. This trout is just one example of the numerous different possibilities of cross breeding different trout together.

Lamprey

By: Sean

In my square there is a trout and a lamprey. A lamprey is an ancient jawless fish from before the time of dinosaurs. Adult lampreys are parasites that latch onto their prey using suction and their eleven to twelve rows of teeth. It will then drill a hole in its prey using its toothed tongue.

Trouts Facing Drought

By Ben B.

Juvenile salmon, trout and other fish species in smaller streams could become stranded in isolated pools if low stream flows continue across the state.. This shows how droughts can and will affect fish negatively. The negative effects include but are not limited to fish suffocation, reduced habitat, and reduced resources.

Microsporidia and Fish

By: Nathan H.

Parasites, they attach themselves
Sometimes to cells
Lots of fish in the sea
Microsporidia attacks thee
Flesh appears like ice
As white as rice
Not widespread
Lives with the fish in the riverbed

Rainbow Trout

by Magnus W.

Rainbow Trout, take kermit by the hand, lead him to the water you understand
Rainbow Trout, Kermit's voyage to the corner of the globe is a real trip
Rainbow Trout, the fin of a brook trout embedded by the sand
Soaking up the thirst of the Lipton Tea
Rainbow Trout, can you see kermit through the wonder of amazement at the oberman
Rainbow Trout, the net is elusive when it casts forth to the opensea
Rainbow Trout, the sequence of kermit braised in the sand,
Soaking up the thirst of the Lipton Tea

Fish Kills

By: George M.

Fish kill, or fish die-off, is an event in which large groups of fish are killed at once. Fish kill comes in many different forms, such as deadly toxins, oxygen depletion, and changes in water temperature. This causes major changes in the ecosystem, with some long lasting effects to the population.

Bear Serenading Trout

By: Joseph S.

Roses are red
Violets are blue
Come to me trout
So I can taste you

Roses are red
Violets are blue
Me see trout
I come eat you

Roses are red
Violets are blue
You taste so good
But now I want more of you

Trout Diseases

By Noah G

Flavobacteria causes huge losses in fish farming worldwide. Researchers are now surveying the variation found amongst these bacteria to better control the disease. Flavobacteria are found in both freshwater and saltwater environments and can cause significant problems in fish farming worldwide.

Trout Poem

By Bradley W.

We start small and then become tall.

Then we feed on sacks of yolk and that's no joke.

We become bigger and bigger but don't know the trigger.

Then we're trout that swim all about.

TROUT

By: Julia P.

Turning into spring

expl**O**ring the waters

Ospreys are bugging me

Using my resources to stay safe

Turning into lunch

Around the Globe

By Roman H.

As the world turns
The trout will swim
The water they will churn

From North to South
And East to West

Trout, There's loads
Look at the globe
But the fishermen
Unload the net
And stab the
Ocean Like a
Bayonet

Fine Dining with Bugs

By: Mia

Ooooh,
A ladybug, A firebug
And even a jitterbug
Small one's, large one's
All in one jug

Come closer please
And let me give you...
A HUG!
Ugh...
